

- Founded in 1947
- Employees: 370 salaried
- 35 Leclerc stores in Aquitaine and 9 in Spain

## E.LECLERC

### 28M packages delivered and 700,000 pallets managed per year with Generix Group Solutions

Based in Cestas (Gironde), the LECLERC-SCASO purchasing centre manages more than 40 Leclerc centres in the southwest region of France and Spain. LECLERC-SCASO has 5 warehouses, specific by product type covering a total area of 81,000 m<sup>2</sup>.

Thanks to Generix Group solutions, LECLERC-SCASO increases the productivity and responsiveness of their warehouses; they handle 100,000 packages per day ensuring an ideal service rate for all stores regardless of the type of activity (jit, promotional or stocked).

The food business of LECLERC-SCASO imposes an exemplary level of traceability, while non-food is characterised by a number of high-level and difficult to manage items. Logistics processes vary depending on the nature of the product. By adopting Generix Group solutions, LECLERC-SCASO responds to these diverse constraints. With great flexibility, they support:

- Central purchasing
- Logistics and warehouse replenishment
- The intranet Connection with Leclerc stores

LECLERC-SCASO'S main objective is to be as reactive as is possible. Their main purpose: to satisfy the standardisation of replenishment for the retail spaces and reconcile the specific demands of store managers.

To control the various movements of the different families of products for various different sizes of stores, LECLERC- SCASO has chosen the GCS WMS (Warehouse Management System) tool which, through its 100% traceability, is able to meet the changing needs and requirements of stores and the rise in volumes.
