## equip their sites with **GCS WMS** On Demand

Veolog offers advanced logistics using over 240,000 m<sup>2</sup> of warehouse spread over 5 sites.

Veolog serves a dozen manufacturing clients and supermarkets, with a fleet of 70 vehicles. 450,000 packages are prepared as well as 30,000 pallets are shipped each month.

The provider chose Generix Group's GCS WMS On Demand, a solution in SaaS mode, so that the costs of their warehouse IT system are proportional to the invoicing of business to their customers. Notably, for their e-commerce offer, they hope to be able to adapt their erratically changing warehouse use with a dynamic and flexible operational management.

With GCS WMS On Demand, Veolog can improve the planning of receptions and organise the necessary resources. They benefit from the functions of one of the best WMS Solutions on the market, with no investment or internal IT resources.
